-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP'711 in view of JP'872 and JP'090.

The applied JP'711 reference teaches a woody electric wave absorbing article comprising a laminated magnetic woody material prepared by bonding facing plates under pressure wherein the adhesive contains a magnetic powder. (see abstract). The JP'711 does not specifically teach the claimed Mn-Zn ferrite powder, stainless steel powder, thickness of the article or absorption characteristics. However, JP'872 teaches that it is well known in the art to use Mn-Zn ferrite powder in a wave absorber. Also, the JP'090 discloses that it is common to use stainless steel powder together with ferrite powder in electric wave absorber. It would have been obvious to one having ordinary skill in the art at the time of the invention to use Mn-Zn ferrite powder and stainless steel powder in the adhesive of JP'711 since such would enhance magnetic loss and enable the wave absorber to be thin. It would have been obvious to optimize a thickness of the

laminated article and the volume ratio of the compounds in the adhesive since such would improve magnetic properties.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Leszek B. Kiliman whose telephone number is 571-272-1509. The examiner can normally be reached on M-T, 6.30-5.00.
